ABOUT

ABSHAN FOOD INDUSTRIES

Mehran Avishe Manufacturing Company was established in 1999 with the aim of producing, breeding, and improving honeybee species, as well as processing and packaging natural hone comb products under the "Abshan" brand. The beautiful Taleghan region, with its diverse and rich vegetation, highlands full of medicinal plants and wild thyme (from which the name "Abshan" is derived), provides an ideal environment for beekeeping and high-quality honey production.

By leveraging this natural habitat and utilizing modern beekeeping techniques, Abshan has contributed to the development of this unique industry while preserving the environment, producing the finest varieties of natural honey in the Alborz region. Additionally, by establishing multiple apiaries across different regions of the country, the company ensures breed improvement and operational support for beekeepers, enabling them to produce diverse types of natural honey for packaging in its factory.

Abshan products are produced in a hygienic environment using state-of-the-art machinery, under the supervision of a quality control unit and a fully equipped laboratory, adhering to global standards.

In 2019, Abshan expanded its agricultural activities by launching a new unit for processing different types of fruit to produce high-quality jams in Afshariyeh Industrial Zone, Hashtgerd. Today, the company has significantly expanded its product line and strengthened its presence in domestic and neighboring markets.

In 2023, Abshan undertook a complete rebranding to unify and modernize the visual identity of its honey and jam products. Through the teamwork of its members, the Abshan brand evolved into a fresher, more refined identity.

With Abshan, experience the "Taste of Iran's Nature" brought to your table in the best possible way.
